Edison & Ford Winter Estates begins Museum Tours and Invention Demonstrations

Fort Myers, Florida (July 6, 2010) - The Edison & Ford Winter Estates is offering new Museum tours and invention demonstrations throughout the summer months.

Invention demonstrations throughout the day include the Edison phonograph every half hour and other presentations including antique cars and tours of the Edison Research Laboratory.

Programs include regular tours of the two inventors homes, garden and lab as well as orientation and touring in the Estates Museum. The 15,000 square foot air conditioned Museum has an impressive collection of inventions and artifacts, special exhibitions and archives. Throughout the summer the Estates offers visitors of all ages a chance to step back into old Florida and learn more about the world of invention through hands-on demonstrations and tours of the property which includes a 1930s research laboratory and hundreds of historical inventions.

Admission includes museum tours, guided tours of the homes and gardens and use of a free audio wand. Estates members are FREE. In addition to providing the opportunity to explore the winter retreats of Thomas Edison and Henry Ford, the site also offers opportunities for the public to enjoy its park-like environment for special events, weddings, corporate functions, and art and musical presentations as well as educational programs throughout the year.
